

## Wilson Combat Announces the Availability of High Performance AR Upper Receivers.

An innovator in high-performance firearms since 1977, Wilson Combat is pleased to announce the availability of over 30 custom AR complete upper receivers, seven different calibers and multiple barrel profiles to fit any sporting or tactical role.

Our gunsmiths skillfully assemble each custom upper with our Wilson Combat exclusive rifle parts including stainless, hand-polished match grade barrels, our exclusive TRIM Rail Interface hand-guard, and our NP3 coated Bolt Carrier Assembly. After a rigorous inspection and final test firing, our legendary Armor-Tuff finish is applied to each receiver and barrel for a non-reflective, protective finish.

Upper receivers are available in .204 Ruger, 5.56 NATO, .223 Wylde, 6.8 SPC-II, 300 Blackout, 7.62X40 WT, and .458 SOCOM in various barrel profiles.

As a builder of custom match-grade and tactical AR's since 1999, Wilson Combat is at the forefront of research, development and perfection of the AR platform.
